

Calleguas Creek Watershed Integrated Regional Water Management Plan Executive Summary

The Calleguas Creek Watershed Integrated Regional Water Management Plan (IRWMP) is comprised of two volumes:

- Volume I: Calleguas Creek Watershed Management Plan Phase I Report
- Volume II: Calleguas Creek Watershed Management Plan Addendum

Volume I was prepared by the Calleguas Creek Watershed Management Plan committees and subcommittees and contains the following:

- Recommendations for studies, total maximum daily load (TMDL) development, and policies to address issues in the Watershed.
- Summary of previous work products for the Watershed, including mapping; studies for hydrology, water quality, and habitat; and public outreach and education efforts.
- An overview of the Watershed, including historical conditions, physical features, biological resources, agricultural resources, mineral resources, and man-made features.
- A general explanation of typical watershed processes, dynamics, and cycles.

Volume II is intended to bridge the gap between the Calleguas Creek Watershed Management Plan and the requirements of the IRWMP found in the Integrated Regional Water Management Grant Program Guidelines.

Volume II was prepared by:

- Calleguas Municipal Water District
- Camrosa Water District
- City of Thousand Oaks
- City of Camarillo/Camarillo Sanitary District
- City of Simi Valley/Ventura County Waterworks District No. 8
- Ventura County Waterworks District Nos. 1 and 19
- Ventura County Resource Conservation District
- Santa Monica Mountains Recreation and Conservation Authority

Volume II refines the action recommendations found in Volume I and focuses on the following three objectives:

- Reducing dependence on imported water.
- Improving water supply reliability.
- Managing and removing salts in the Watershed and complying with TMDL requirements.

Volume II also specifically discusses the projects proposed for funding under Proposition 50, as follows:

1. Calleguas Regional Salinity Management Project (Brineline)
2. Renewable Water Resource Management Program for the Southern Reaches of the Watershed
3. Camarillo Groundwater Treatment Facility

Calleguas Creek Watershed Integrated Regional Water Management Plan Executive Summary

4. South Las Posas Basin Regional Desalter
5. Somis Desalter
6. West Simi Desalter
7. VCWWD1 Expansion of Reclaimed Water Distribution System
8. Simi Valley Regional Recycled Water System
9. Conejo Creek North Fork - Wildwood Park Water Management Enhancement Project
10. Calleguas Creek Watershed Arundo/Tamarisk Pilot Removal Project
